### SECTION III – RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. The risks described below are not the only ones relevant to us, our Equity Shares, the industry or the segment in which we operate. Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may arise or may become material in the future and may also impair our business, results of operations and financial condition. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the trading price of our Equity Shares could decline, and as prospective investors, you may lose all or part of your investment. You should consult your tax, financial and legal advisors about particular consequences to you of an investment in this Issue. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

To obtain a complete understanding, you should read this section in conjunction with the sections “Industry Overview”, “Our Business” and “Management’s Discussion and Analysis of Financial Position and Results of Operations” on pages 88, 98 and 149 of this Draft Red Herring Prospectus, respectively. The industry-related information disclosed in this section that is not otherwise publicly available is derived from industry sources as well as Government Publications. Industry sources as well as Government Publications generally state that the information contained in those publications has been obtained from sources believed to be reliable but that their accuracy and completeness and underlying assumptions are not guaranteed and their reliability cannot be assured.

This Draft Red Herring Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and, in the section titled “Forward-Looking Statements” on page 21 of this Draft Red Herring Prospectus.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Unless the context requires otherwise, the financial information of our Company has been derived from the Restated Financial Information.

#### **Materiality:**

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of Risk Factors:

- Some events may not be material individually but may be found material collectively;
- Some events may have material impact qualitatively instead of quantitatively; and
- Some events may not be material at present but may have a material impact in future.

#### **Classification of Risk Factors**

The financial and other related implications of risks concerned, whether quantifiable have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk over another.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and sums of the amount listed are due to rounding off.

In this section, unless the context requires otherwise, any reference to “we”, “us” or “our” refers to Accord Transformer & Switchgear Limited.

The risk factors are classified as under for the sake of better clarity and increased understanding.

## **INTERNAL RISK FACTORS**

- 1. We do not own the premises in which one of our manufacturing units is located and the same are on lease arrangement. Any termination of such lease and/or non-renewal thereof and attachment by Property Owner could adversely affect our operations.**

One of our manufacturing units located at Plot No. E-11 (E82), RIICO Industrial Area Khushkhera, Tehsil Tapukara, District Alwar (Rajasthan) is not owned by our Company. The premise was taken on Lease Agreement from independent entity on a monthly rental basis for a period of 60 months with an option to renew the same by mutual consent.

Unless it is renewed, upon termination of the lease, we are required to vacate the premises of our manufacturing unit. There can be no assurance that the term of the agreements will be renewed and in the event the Lessor terminates or does not renew the agreements, we are required to vacate the said premise where operational activities are carried out. In such a situation, we have to identify and take alternative premises and enter into fresh lease and license agreement at less favourable terms and conditions to shift our manufacturing unit and operations. Such a situation could result in time overruns and may adversely affect our operations temporarily.

- 2. We are contractually and commercially subject to stringent performance obligations, including requirements relating to quality and delivery, and any failure to adhere to such obligations may result in cancellation of existing or prospective orders, initiation of product recalls, or the assertion of warranty and liability claims against us.**

We are engaged in the manufacture and supply of critical and complex products that are required to meet precise specifications, including with respect to quality, measurements and tolerances. Any failure on our part to comply with such specifications or quality standards may affect our ability to meet customer requirements, which could result in cancellation of existing or future orders, costs relating to repair or replacement of defective products, product recalls, and warranty or liability claims. Any such circumstances may adversely affect our business, financial condition, results of operations and cash flows.

Our purchase orders generally contain standard liability provisions in relation to quality and delivery, which typically do not provide for contractual limitations. Consequently, we are required to provide warranties for such obligations, which may or may not be capped by reference to duration or monetary value. Supply of defective products could also result in litigation being initiated by our customers, which may adversely impact our reputation, business, financial condition, results of operations and cash flows.

In addition, we may be subject to claims by third parties if the use of our products causes personal injury or property damage. To the extent such liabilities are not covered by insurance, we may be required to bear such costs, which could adversely affect our financial condition, results of operations and cash flows. While we have not been subject to product liability claims during the last three Fiscals, there can be no assurance that we will continue to comply with applicable regulatory requirements or the quality standards expected by our customers, or that no product liability claims will arise in the future.

- 3. A significant portion of our revenues is derived from a limited number of customers, and the loss of one or more such customers may adversely affect our business, cash flows, results of operations and financial condition.**

A substantial portion of our revenues is attributable to a limited number of customers. Our top ten customers contributed 81.78%, 68.68% and 88.90% of our revenue from operations for the Fiscal Years ended March 31, 2025, 2024 and 2025, respectively and our top five customers contributed 71.55%, 56.14% and 79.43% of our revenue from operations for the Fiscal Years ended March 31, 2025, 2024 and 2025, respectively. As we conduct business with these customers primarily on a purchase order basis, without long-term contractual commitments, there can be no assurance that such customers will continue to place orders with us in the future.

Our reliance on a limited customer base exposes us to various risks, including reductions, delays or cancellations of orders, adverse changes in terms of business, or termination of relationships by significant customers. Any such development may adversely affect our revenues, profitability, and cash flows. In addition, to retain certain customers, we may be required to extend commercial terms that could constrain our resources.

There is no assurance that our existing customers will continue to engage with us at the same level, or that we will be able to secure new customers on similar terms. Any reduction in business from our significant customers, change in their business strategies, or preference for competitors may have an adverse effect on our business, financial condition, results of operations and cash flows.

- 4. Our business is dependent on the accuracy and effectiveness of our product design process, and any deficiency in this process may adversely affect our operations, business and reputation.**

Product design constitutes a critical component of our equipment manufacturing process, as it impacts the proper functioning, efficiency and compliance of our equipment with customer requirements and industry standards. We rely on our in-house

team of 14 employees for undertaking designing, engineering and preparation of blueprints of our equipment. Any errors, omissions or deficiencies in the design stage may result in production losses, inability to meet customer specifications, cancellation of customer orders, or claims relating to defective products.

Further, inaccuracies in the design process may disrupt material planning, production scheduling and overall efficiency of our operations, which may have an adverse effect on our business, financial condition, results of operations and reputation. There can be no assurance that our design processes will at all times be free from error or that any such errors, if they occur, will not have a material adverse impact on our operations.

**5. *The demand for our transformers and relay panels is closely tied to growth in the power generation, transmission, distribution, and infrastructure sectors, which may lead to variability in our operational results and financial performance.***

The demand for our products, such as transformers and relay panels, is closely linked to the growth and performance of the power generation, transmission, distribution, and infrastructure sectors. Fluctuations in these industries, driven by factors such as economic conditions, regulatory changes, or shifts in infrastructure investment, could result in inconsistent demand for our products, leading to variability in our operational results and financial performance.

Such variability may cause revenue fluctuations, challenges in production planning, and potential inefficiencies in resource allocation, ultimately impacting our profitability and financial stability. While we strive to diversify our market presence and align our strategies with industry trends, our dependence on these sectors exposes us to external market dynamics beyond our control. These fluctuations could have a material adverse effect on our business operations and overall financial condition.

**6. *Our business is dependent on the performance and growth of the power generation, transmission and distribution sector, and any slowdown or adverse development in this sector may affect our business, financial condition and results of operations.***

Demand for our transformers and switchgears is closely linked to investment and growth in the power generation, transmission and distribution industry as well as overall infrastructure development. Any slowdown, delay or disruption in these sectors may result in a reduction in demand for our products, cancellation or postponement of orders, rescheduling of delivery commitments, or delays and defaults in customer payments.

As our products are primarily supplied to customers in the power sector, any prolonged or temporary downturn in the sector, adverse change in government policies, reduction in capital expenditure by utilities or infrastructure developers, or shift in industry dynamics may have an adverse effect on our revenues, cash flows, business and results of operations.

**7. *There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with the Registrar of Companies.***

The Company's corporate filings contain certain errors that may result in regulatory scrutiny or penalties.

- Non-filing of statutory form in relation to director appointment**

The Company did not file Form DIR-12 in relation to the regularisation of Mrs. Shalini Singh's appointment at the Annual General Meeting held on September 30, 2015, within the prescribed timeline under the Companies Act, 2013. Although the Company has since undertaken corrective measures by filing the requisite form along with payment of additional fees, the delay may subject the Company to penalties under applicable laws. The Company has filed a compounding application with the Regional Director, Northern Region, which is currently under process. Further, Mrs. Shalini Singh was incorrectly shown as Additional Director in all the Annual filings since 2014. Any adverse order or penalty in this regard may impact the Company.

- Non-attachment of Cash Flow Statement in annual filings.**

In respect of the filings of Form AOC-4 for the financial years 2015–16 to 2022–23, the Company did not attach the Cash Flow Statement along with the Financial Statements filed. While the Company has taken steps to address this matter by submitting an adjudication application to the Registrar of Companies (RoC) along with the necessary Form GNL-1 to regularize the default, the said application is currently under process. The Company may be subject to penalties or other adverse actions pursuant to this non-compliance.

- Delays in filing statutory forms with the Registrar of Companies**

The Company has experienced delays in filing statutory forms such as CHG-1, AOC-4 XBRL, MGT-7, ADT-1, ADT-3, DPT-3, DIR-12, GNL-2, PAS-3, MR-1, and MGT-14 under the provisions of the Companies Act, 2013. Although the Company has filed these forms with additional fees, we cannot assure such delays will not occur in future

- Discrepancies in disclosures regarding Board Meetings**

There were discrepancies in the date and total number of the Board meetings as reported in the Board's report and in e-Form MGT-7 ('Form for filing annual return') vis-à-vis the Board Minutes provided for verification. While the Company has undertaken corrective measures by filing form GNL-2, such discrepancies may still render the Company liable to penalties under the provisions of the Companies Act, 2013.

- Non-disclosure of share transfer details**

In the Form MGT-7 filed for the financial year 2014–15, the Company did not attach the list of share transfer details. Although the Company has subsequently undertaken corrective measures, by filling GNL 2, such discrepancies may still render the company liable to penalties under the provisions of the Companies Act, 2013.

- Non-filing of charge creation in relation to vehicle finance**

The Company did not file Form CHG-1 for availing financial facility from Mercedes-Benz Financial Services Private Limited against hypothecation of a motor vehicle. The Company has subsequently undertaken corrective measures and filing GNL-1 before the Registrar of Companies, Delhi & Haryana. However, any adverse order passed in this matter may expose the Company to penalties or compliance-related consequences.

**8. In the past our Managing Director Mr. Pradeep Kumar Verma (DIN 05113022) was disqualified as reflected in DIN Status on website of Ministry of Corporate Affairs.**

Our Managing Director, Mr. Pradeep Kumar Verma, was disqualified under Section 164(2)(a) of the Companies Act, 2013, for the period effective from November 1, 2016, to October 31, 2021, resulting from the strike-off of company named Inorbit Technofab Private Limited in which he was a director at that time. Based on current DIN Status on MCA Website, the disqualification period appears to have expired. However, we are unable to trace supporting documentation/Order to confirm the removal of Mr. Pradeep Kumar Verma's disqualification. Although his Director Identification Number (DIN) is currently reflecting 'Approved' status and he is eligible to continue as a director, we cannot assure you that no similar disqualification or regulatory action will arise with respect to any of our Directors in the future, and any such occurrence may adversely affect our business operations, financial condition and reputation.

**9. We were not be able to locate documentary evidence relating to receipt of consideration for shares issued on rights basis in past.**

Our Company issued equity shares on right issue basis pursuant to a Board resolution dated February 27, 2015, and the shares were allotted pursuant to a Board resolution dated March 30, 2015. However, we have not been able to locate the relevant bank statements or other supporting documents evidencing the receipt of share application money/consideration in lieu of such allotment. While the management has confirmed that consideration for such shares was duly received, in the absence of documentary proof, there can be no assurance that regulatory authorities will not question the validity of such allotment or compliance with applicable laws.

**10. Any non-compliance or delays in EPF and ESI Return Filings may expose us to penalties from the regulators.**

As a Company, we are required to file EPF and ESI returns with the respective authorities. However, there are certain inadvertent delays in filling of EPF and ESI returns in the past for the FY 2025, 2024 and 2023. A corrective measure has been taken by our company to improve the internal system for payment of EPF and ESI to mitigate the technical difficulties. However, we cannot assure that there won't be any inadvertent discrepancies in our EPF and ESI filling in future, which may adversely affect our reputation and goodwill of the company.

**11. Our net cash flows from Operating, Investing and Financing activities have been negative in some years in the past. Any negative cash flow in the future may affect our liquidity and financial condition.**

Sustained negative cash flow could impact our growth and business. Our Company had reported certain negative cash flows from our operating activities, investing activities and financing activities in some years during previous three (3) years as per the Restated Financial Statements and the same are summarized as under:

Particulars	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023
Cash Flow from Operating activities	(87,968.71)	(48,236.60)	20,125.62

**12. Our operations require substantial working capital to sustain growth. Insufficient working capital could hinder our ability to maintain operational efficiency and adversely affect our financial results.**

Our operations demand significant working capital to support ongoing activities, including procurement of raw materials, production processes, and timely fulfillment of customer orders. Insufficient working capital, whether due to cash flow constraints, delayed receivables, or unexpected financial obligations, could limit our ability to maintain operational efficiency, meet production demands, and pursue growth opportunities.

Such limitations may lead to production delays, missed contractual commitments, and reduced customer satisfaction, ultimately impacting our revenue and profitability. While we implement financial planning and cash management strategies to ensure adequate liquidity, challenges in securing sufficient working capital could pose significant risks. Inadequate funding could have a material adverse effect on our operational continuity and overall financial performance.

***13. The majority of our revenue is derived from transformer sales. Inability to effectively manage existing client relationships or attract new clients could adversely affect our business prospects.***

A significant portion of our revenue is generated from the sale of specialized products, which underscores the importance of maintaining strong relationships with existing clients and actively attracting new ones. Failure to effectively manage these client relationships or to expand our customer base could lead to reduced sales, limited market reach, and weakened competitive positioning.

Such challenges may result in diminished revenue streams, constrained growth opportunities, and potential reputational harm, ultimately impacting our financial stability and business prospects. While we prioritize client engagement and market development strategies, the inability to sustain or grow our client portfolio could have a material adverse effect on our overall business performance and long-term success.

***14. We have working capital requirements. If we experience insufficient cash flows to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.***

Our operations are inherently working capital intensive, with inventories and trade receivables constituting a significant portion of our current assets. We are engaged in the manufacturing of transformers and switchgear, which necessitate the procurement and maintenance of a large quantum of raw materials, including multiple sundry items, to ensure uninterrupted production. Accordingly, maintaining adequate levels of inventory is critical to our business operations as it acts as a buffer against potential supply chain disruptions. However, any failure to efficiently manage our inventory in response to changes in demand, supply constraints or market dynamics may result in higher holding costs, obsolescence, or stock-outs, which could materially and adversely impact our business, financial condition and results of operations.

Our Company's working capital requirements for the year ended March 31, 2025, March 31, 2024 and March 31, 2023 was ₹ 2,51,411.05 thousand, ₹ 95,371.32 thousand and ₹ 30,942.59 thousand, respectively. As on March 31, 2025 our Company had sanctioned working capital facilities aggregating to ₹ 1,64,500.00 thousand and outstanding working capital facilities aggregating to ₹ 1,11,761.83 thousands. As on March 31, 2025 we had a total sanction of ₹ 1,64,500.00 thousand and unutilized amount was ₹ 52,738.17 thousand. Our net working capital days for Fiscals 2025, Fiscal 2024 and Fiscal 2023 were 107 days, 55 days and 40 days, respectively. We may have a higher inventory level at our facilities due to various factors such as, delay in deliveries to the customers, natural disasters, pandemic, government-imposed restrictions, etc.

All of these factors may result, in increase in the amount of receivables, inventory and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. While there have been no instances of inaccurate budgeting of working capital requirements for the Fiscals 2025, 2024 and 2023, there may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the terms and conditions with our customers, it may lead to write-offs bad debts and/ or delay in recoveries which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we may not be

able to maintain our Sales level and thus adversely affecting our financial health.

For further details of working capital requirements, please refer to the chapter titled "Objects of the Issue" on page 23 of this Draft Red Herring Prospectus.

**15. Failure to adequately protect, maintain, or enforce our rights in relation to our trademarks, brand names, or brand identities may adversely affect our business operations, financial condition, and competitive position.**

The Company has made an application on August 25, 2025 for registration of our company logo under the Trademark Act, 1999 with the Registrar of Trademarks and the same is pending. Our trademark application is currently at the status of "Formality Check Pass," and there is no assurance that such application will be approved. In the absence of trademark registrations, our ability to initiate infringement proceedings or enforce our rights against third parties who may use or infringe our trademarks could be limited. As a result, we may not be able to prevent unauthorized use of our trademarks, brand names or brand identities, which may reduce the value of our brand and affect our competitive position.

Even if our trademarks are registered, the steps we take to protect our intellectual property may not be sufficient, and any failure to maintain or enforce our rights could result in loss of brand recognition and business value. If we are not able to maintain our brand identity, which distinguishes us from competitors, our ability to compete may be affected. If we are unable to compete effectively, we could lose customers, which may impact our revenues, profitability and overall financial performance.

We also take measures to comply with the intellectual property rights of third parties; however, it is not possible to be certain that our operations, content or offerings do not infringe, or will not be alleged to infringe, such rights. Any such claims could lead to litigation, divert management's time and resources, expose us to liabilities, or require us to enter into royalty or licensing arrangements, or stop using the relevant content, brand or offering. These circumstances may have an effect on our business, financial condition and results of operations.

The laws relating to intellectual property rights in India continue to develop and may be subject to varying interpretations by authorities. Any uncertainty in enforcement may expose us to risks of inadequate protection and may affect our ability to safeguard our intellectual property and maintain our competitive position.

**16. Loans availed by our Company are secured by personal guarantees extended by Promoters and Directors. In the event of invocation of such guarantees by the lenders, our Promoters and Directors may become personally liable for the repayment obligations.**

Our Promoters, namely, Mr. Pradeep Kumar Verma and Mrs. Shalini Singh, have furnished personal guarantees to secure a significant portion of our existing borrowings availed from HDFC Bank Limited and may continue to provide such guarantees and other forms of security subsequent to the listing of our Equity Shares. In the event of any default under our loan agreements, the lenders may invoke such personal guarantees, which could adversely affect the reputation, creditworthiness, and net worth of our Promoters. Such invocation may also impair their ability to continue extending financial and strategic support to our Company and may result in certain impediments in the decision-making process relating to our business. Consequently, any such development could have a material adverse effect on our business, financial condition, results of operations, cash flows, prospects, and reputation. Further, there can be no assurance that we will be able to procure alternate guarantees or security acceptable to our lenders. Failure to do so may require us to prepay outstanding borrowings or seek additional sources of capital on terms that may be unfavorable, which could further adversely impact our financial condition and cash flows. For further details in relation to the borrowings availed by our Company, please refer to "Statement of Financial Indebtedness" on page 191 of this Draft Red Herring Prospectus.

**17. Our customers impose stringent performance standards, including but not limited to quality and delivery timelines. Non-compliance with these standards could result in the termination of current and prospective contracts, product recalls, or warranty and liability claims.**

Our customers enforce rigorous performance expectations, encompassing but not limited to product quality and adherence to delivery schedules. Failure to meet these standards could lead to the cancellation of existing and future contracts, necessitate product recalls, or result in warranty and liability claims.

Such non-compliance may incur significant financial penalties, damage customer relationships, and harm our reputation, ultimately impacting our ability to secure new business opportunities. While we prioritize stringent quality control and efficient operational processes to align with customer requirements, the complexity and variability of these standards pose ongoing challenges. Failure to consistently meet these expectations could have a material adverse effect on our business operations, financial condition, and market standing.

**18. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, any failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations may adversely affect our operations.**

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are subject to periodical renewal. Any failure to renew the approvals that may expire, or to apply for the required approvals, licences, registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects.

Further, we have applied for Fire NOC. Further, there can be no assurance that the relevant authorities will issue such licenses, registrations and approvals in a timely manner or at all.

Additionally, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals which may result in the interruption of our operations and may have a material adverse effect on our business, financial condition, cash flows and results of operations. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, see "**Key Industry Regulations and Policies**" and "**Government and Other Approvals**" for permits/licenses required for the business on pages 116 and 166, respectively.

**19. Our business and financial condition are dependent on our ability to secure new purchase orders and contracts, and any inability to do so may adversely affect our operations, revenues and cash flows.**

We are engaged in the manufacture of transformers and switchgears, which are essential equipment for the power generation, transmission and distribution industry. Our revenues are primarily dependent on receipt of purchase orders from customers, which are generally awarded through a request for quotation ("RFQ") process. Under this process, customers specify product requirements and technical parameters, and orders are typically awarded on the basis of compliance with such specifications, prescribed qualification criteria and competitive pricing. There can be no assurance that we will consistently secure such purchase orders in our favour.

Our business growth is closely linked to our ability to obtain new contracts, the timing and outcome of which are inherently uncertain. Our results of operations and cash flows may fluctuate depending on the timing of award of contracts, commencement of production, and timely delivery of equipment in accordance with customer requirements. Failure to secure new purchase orders or delays in contract awards could have an adverse effect on our business, financial condition, results of operations and cash flows.

**20. Object of the issue for which the funds are being raised have not been appraised by any bank or financial institutions and we have not yet placed orders for certain machineries and equipment proposed to be acquired from the Issue Proceeds, and any delay or cost overrun in procurement or installation may adversely affect our expansion plans, business, financial condition and results of operations.**

As part of our expansion strategy, we propose to utilize a portion of the Net Proceeds of the Issue towards acquisition of machineries and equipment for expansion of our business. While we have identified the required machineries and equipment and obtained quotations from suppliers, we have not placed final orders for machineries and equipment aggregating to ₹1,54,025.00 thousand.

Since part of the funding for the proposed acquisition of machineries and equipment is to be met from the Issue Proceeds, any delay in access to such proceeds could delay the placement of orders. Further, factors such as supplier pricing, delivery schedules and after-sales support will have a direct bearing on procurement. Any delay on the part of suppliers in delivery, installation or commissioning of the machineries and equipment may, in turn, delay the implementation of our expansion plan.

Additionally, the quotations obtained by us are valid only for a limited period. If the validity lapses prior to placement of final orders, the cost of such machineries and equipment may increase, leading to cost overruns and higher project costs. Further, inflation in the cost of machinery may also contribute to such overruns. Any such time or cost escalation could adversely affect our expansion plan, profitability, results of operations and financial condition. For further details, see "**Objects of the Issue**" on page 81 of this Draft Red Herring Prospectus.

The objects of the Issue have not been appraised by any bank or financial institution, and our funding requirement is based on current conditions, internal estimates, estimates received from the third-party agencies and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of our industry, we may have to revise our business plan and/ or management estimates from time to time and consequently our

funding requirements may also change. Such internal estimates may differ from the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our expenditure, subject to applicable laws. In case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements, and may have an adverse impact on our business, results of operations, financial condition and cash flows. Accordingly, investors in the Equity Shares will be relying on the judgment of our management regarding the application of the Net Proceeds. Further, pursuant to Section 27 of the Companies Act, any variation in the Objects of the Issue would require a special resolution of the shareholders and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects of the Issue, at such price and in such manner in accordance with applicable law. Our Company, in accordance with the applicable law and to attain the objects set out above, will have the flexibility to deploy the net proceeds. Pending utilisation of the Net Proceeds for the purposes described above, our Company may temporarily deposit the Net Proceeds within one or more scheduled commercial banks included in the Second Schedule of RBI Act as may be approved by our Board.

**21. Our Company is not party to any legal proceeding as on date. However, we cannot assure that in future our Company, its directors, its Promoters, KMPs and SMPS shall not be party to any litigation, if such proceedings arises it may have a material adverse effect on our business, results of operations and financial condition.**

**22. We are significantly dependent on our Promoters and Directors, namely, Mr. Pradeep Kumar Verma and Mrs. Shalini Singh. Any loss of their services could severely disrupt our operations and may have a material adverse effect on our business, results of operations, and financial condition.**

Our business and the successful implementation of our growth strategy are dependent on our Promoters and Directors, namely Mr. Pradeep Kumar Verma and Mrs. Shalini Singh, who are actively involved in overseeing our day-to-day operations, strategy, and overall growth. In the event that one or more of them are unable or unwilling to continue in their present roles, suitable replacements may not be readily available and identifying and retaining such replacements could involve significant time and cost. There can be no assurance that we will be able to retain their services or recruit equally qualified and experienced personnel in a timely manner, or at all. Any such loss of our Promoters and whole-time Directors, or our inability to replace them, may adversely affect our ability to execute our business strategy, raise funding, enhance our brand profile, make critical strategic decisions, and manage our operations effectively. Consequently, this could have a material adverse effect on our business, results of operations, financial condition, and cash flows.

**23. Our manufacturing operations involve inherent risks, and any accident, disruption or failure in our facilities may adversely affect our business, financial condition, results of operations and prospects.**

Our manufacturing processes involve complex activities that may pose risks to the safety of our employees and the integrity of our facilities. Despite implementation of safety measures and maintenance of insurance coverage, accidents may still occur at our manufacturing facilities. Such accidents may result in injury to employees, damage to property or equipment, environmental harm, delays in manufacturing or delivery, or even suspension of operations. In addition, accidents or operational disruptions could expose us to regulatory actions, third-party claims, or litigation, the outcome of which is uncertain and may involve significant costs and liabilities.

A significant disruption at our facilities could adversely impact our production schedules, increase costs, reduce sales, and impair our ability to meet customer demand. Further, such events may require substantial capital expenditure for restoration or compliance, or result in negative publicity, all of which could adversely affect our profitability, business, financial condition, results of operations and prospects.

**24. Any deficiencies in the storage, processing, or handling of our raw materials, work-in-progress, or finished products may result in damage to our inventories and could adversely affect our business, results of operations, and cash flows.**

We typically store our raw materials, work-in-progress, stock-in-trade, and finished goods in our manufacturing facilities. The storage, processing, and handling of such materials and products requires adherence to prescribed standards and procedures. Any lapses in these processes, including inadequate storage conditions, mishandling during processing, or deficiencies in supervision, could lead to deterioration in the quality of our raw materials, damage to our work-in-progress, or impairment of finished goods. Such occurrences may adversely affect our ability to meet production schedules, maintain consistent quality standards, and fulfil customer requirements. This, in turn, could have an adverse impact on our business, financial condition, results of operations, and cash flows. Although we have not encountered any such incidents in the past, there can be no assurance that such events will not occur in the future. For further details, please refer to "Our Business" on page 179.

**25. We utilize advanced technologies in the manufacturing, design, and installation of transformers. Inability to adopt emerging technologies or comply with government-mandated technological requirements could adversely affect our market position.**

Our operations rely on the integration of advanced technologies in the manufacturing, design, and installation of our products. Failure to adopt emerging technological advancements or to comply with government-mandated technological standards and regulations could hinder our ability to maintain product quality, operational efficiency, and competitive differentiation.

Such challenges may result in reduced market relevance, loss of customer confidence, and diminished ability to meet industry demands, ultimately weakening our market position. While we actively invest in research and development to stay abreast of technological trends, the rapid pace of innovation and evolving regulatory requirements pose ongoing risks. Inability to adapt to these changes could have a material adverse effect on our business operations and competitive standing.

**26. If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.**

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Further, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. There have been instances in the past, wherein licenses and approvals obtained by our Company, were obtained with a delay and therefore our Company operated its manufacturing unit without such licenses and approvals.

Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be

subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this non-compliance. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may have a material adverse effect on our business. While, such instances have not occurred in the past, however occurrence of such instances in the future may have an adverse effect on our financial condition and results of operations.

For further details on the licenses obtained by our Company and licenses for which renewal applications have been made, kindly refer the chapter titled "**Government and Other Approvals**" beginning on page 166 of this Draft Red Herring Prospectus.

**27. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, any failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations may adversely affect our operations.**

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are subject to periodical renewal. Any failure to renew the approvals that may expire, or to apply for the required approvals, licences, registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects.

Additionally, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals which may result in the interruption of our operations and may have a material adverse effect on our business, financial condition, cash flows and results of operations. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, see "*Key Industry Regulations and Policies*" and "*Government and Other Approvals*" for permits/licenses required for the business on pages 116 and 166, respectively.

**28. Our business is dependent on our operating facility in Bhiwadi, Rajasthan. The loss or shutdown of our facilities could have a material effect on our business, financial condition and results of operations.**

Our facility at Bhiwadi are subject to operating risks, such as shutdowns due to the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, adequate utilisation rates, obsolescence of equipment, labour disputes, strikes, lockouts, industrial accidents, disruption by extremist groups, or any other reason, and the need to comply with the directives and regulations of the Government of India ("GoI") and relevant state government authorities. Any inability to retain or manage workers, or any disputes with them, may adversely impact our ability to meet production schedules, result in delays in the supply of our products, cause accumulation of inventory, and in certain cases, lead to a temporary shutdown of operations. Further, our inability to effectively manage the operations of our manufacturing facility may result in a decline in output and disruption of our business activities. Although we seek to minimise operational risks, any disruption at our facility could adversely affect our business, financial condition, results of operations, and prospects.

**29. Any shortage or interruption in the supply of electricity or power could disrupt our manufacturing operations and may have an adverse effect on our business, results of operations, and financial condition.**

Our manufacturing operations require a substantial and continuous supply of electricity and power, and any shortage or non-availability could adversely affect our operations. We currently source the majority of our power requirements from state electricity boards. For Fiscal 2023, Fiscal 2024 and Fiscal 2025, our power and fuel and Generator Running and Maintenance costs were ₹ 1,613.91 thousand, ₹ 1,903.17 thousand, and ₹ 3,967.41 thousand, respectively, representing 0.41%, 0.41%, and 0.56% of our total expenses. In the event of a disruption in supply, we may need to rely on alternative sources of power, which may not consistently meet our requirements and may involve higher costs, thereby increase our cost of production and affect profitability. Further, if adequate power is not available, we may be required to temporarily suspend operations until supply is restored. Any such disruption in manufacturing operations could adversely affect our customer relationships, business, results of operations, and financial condition.

**30. Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.**

Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to

the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We have not paid any dividend in the past and we cannot assure you that we will be able to pay dividends in the future.

**31. *We rely on third-party transportation services for our logistics needs. Any disruptions in these services could negatively impact our operations, business, and financial condition.***

Our operations depend significantly on third-party transportation services to facilitate the timely delivery of raw materials to our manufacturing facilities and finished products to our clients. These external logistics providers are critical to maintaining efficient supply chain operations and meeting customer expectations. However, disruptions such as delays, labor disputes, fuel shortages, regulatory changes, or operational failures by these third-party providers could interrupt our supply chain, hinder production schedules, and delay product deliveries, thereby affecting our ability to fulfill customer orders promptly.

Such disruptions could lead to increased operational costs, potential loss of customer trust, and missed business opportunities, ultimately impacting our revenue and profitability. While we strive to collaborate with reliable transportation partners and maintain contingency plans, the reliance on external logistics services exposes us to risks beyond our direct control. These challenges could have a material adverse effect on our business operations, financial condition, and overall market competitiveness.

**32. *Our insurance coverage may not fully protect against all operational risks, potentially resulting in significant adverse effects on our business.***

Our operations are conducted in a multifaceted industrial landscape where inherent risks—ranging from equipment malfunctions and supply chain interruptions to workplace incidents and unforeseen legal liabilities—pose ongoing challenges to manufacturing and service delivery. To safeguard against these uncertainties, comprehensive insurance coverage is maintained, encompassing key areas such as property damage, liability protection, and business interruption. However, no policy can guarantee absolute protection against every conceivable hazard, as coverage limits, exclusions, or evolving risk profiles may leave certain exposures unaddressed, potentially leading to substantial financial outlays in the event of significant claims.

Such gaps in insurance adequacy could strain liquidity, impair recovery from disruptions, and divert resources from core growth initiatives, ultimately exerting a material adverse influence on operational continuity, profitability, and overall financial health. While proactive risk assessments and periodic policy reviews are integral to our strategy, the dynamic nature of industry threats underscores the possibility of uncovered losses that could erode stakeholder value and competitive resilience.

## **EXTERNAL RISK FACTORS**

**33. *Our business and operations are located in India and as such, we are subject to regulatory, economic, social and political uncertainties in India, many of which are beyond our control.***

The Indian economy and capital markets are influenced by economic, political and market conditions in India and globally. We are incorporated in India, and almost all of our business and all of our personnel are located in India. Consequently, our business, cash flows and results of operations will be affected by a number of macroeconomic and demographic factors in India which are beyond our control. In particular, our total income and profitability are strongly correlated to consumer discretionary spending in India, which is influenced by general economic conditions, salaries and employment levels and consumer confidence. Recessionary economic cycles, a protracted economic slowdown, a worsening economy, increased unemployment, increased energy prices, rising interest rates or other industry-wide cost pressures could lead to a decline in our total income and profitability.

While our results may not necessarily track India's economic growth figures, the Indian economy's performance affects the environment in which we operate. These factors could have an adverse effect on our business, financial condition, cash flows and results of operations.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

**34. *Any non-compliance with, or changes in, environmental, health and safety, labour or other applicable laws and regulations by us or our manufacturing partners could adversely impact our business operations, financial condition, results of operations and cash flows.***

We, as well as our manufacturing partners, are subject to various laws and regulations governing labour and employment matters, including minimum wages, maximum working hours, overtime, working conditions, hiring and termination of employees, engagement of contract labour, work permits, maintenance of regulatory and statutory records and making of

periodic payments. For further details, see ‘Key Regulations and Policies in India’ on page 182. Any failure by us or our manufacturing partners to comply with such laws and regulations may result in enforced shutdowns, regulatory sanctions, imposition of penalties, revocation of approvals and permits, or initiation of litigation and other proceedings, any of which may result in increased costs, disruption of operations and have an adverse effect on our business and results of operations.

We have incurred, and expect to continue incurring, costs towards compliance with applicable health, safety and labour laws and regulations. However, we cannot assure you that we or our manufacturing partners will be able to comply with all such laws, regulations and the terms and conditions of any consents or permits in the future, or that such compliance will not result in a curtailment of production or a material increase in production and operating costs. Further, we may, in the future, be held liable for any regulatory lapses or non-compliances and may incur costs or penalties not covered by our existing insurance policies, which may adversely affect our business, financial condition, results of operations and cash flows.

In addition, our operations require us to obtain and maintain a number of statutory and regulatory approvals, consents, licences and permits under applicable central, state and local laws in India. Many of these approvals are valid for a limited period and are subject to renewal. We cannot assure you that such approvals will be granted, renewed or issued to us in a timely manner, or at all. Any failure to obtain or renew such approvals could materially and adversely affect our business and operations. For details of such approvals, including approvals and registrations applied for, pending renewal or not yet applied for, see ‘Government and Other Approvals’ on page 166.

**35. Our business, financial condition, results of operations, cash flows and the market price of the Equity Shares may be materially and adversely affected by natural disasters, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events beyond our control.**

Natural calamities, such as earthquakes, floods, cyclones and other extreme weather events, as well as epidemics and pandemics, including COVID-19, or man-made disasters, such as acts of terrorism, war, environmental accidents or industrial incidents, may cause significant disruption to economic activity in India or globally. Such events could damage our properties, facilities or inventory, adversely affect productivity, necessitate evacuation of personnel or suspension of operations, and result in significant losses. Further, acts of terrorism, civil unrest, or adverse social, political and economic developments in India may adversely impact investor confidence and increase the perception of investment risk in Indian companies. The extent and severity of such events, including prolonged or abnormal rainfall or other natural calamities, could materially and adversely impact the Indian economy, which, in turn, could negatively affect our business, prospects, financial condition, results of operations and the price of the Equity Shares.

**36. A downgrade in ratings of India, may affect the trading price of the Equity Shares.**

India’s sovereign debt rating could be downgraded due to several factors, including changes in tax or fiscal policy or a decline in India’s foreign exchange reserves, all which are outside the control of our Company. Our borrowing costs and our access to the debt capital markets depend significantly on the sovereign credit ratings of India. Any adverse revisions to India’s credit ratings for domestic and overseas debt by international rating agencies may adversely impact our ability to raise additional external financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of the Equity Shares.

**37. In the past, there have been changes in Indian law related to foreign investments in India. Any such changes or restrictions on foreign investors may adversely affect the trading price of Equity Shares.**

Foreign investment in Indian securities is subject to regulation by Indian regulatory authorities including FEMA. Under foreign exchange regulations which are currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions) provided they comply with the pricing guidelines and reporting requirements specified under applicable law. Further, unless specifically restricted, foreign investment is freely permitted in majority of the sectors up to any extent and without any prior approval of Government of India, but the foreign investor is required to follow certain prescribed procedures for making such investment. Under the Consolidated FDI Policy, 100% foreign direct investment is permitted in a company engaged in manufacturing, under the automatic route, subject to certain conditions specified thereunder.

Further, in accordance with the provisions of the FEMA and the Foreign Exchange Management (Non-debt Instruments) Rules, 2019 as amended from time to time, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India. We cannot assure investors from such jurisdictions that any required approval from the RBI or any other governmental agency can be obtained on any particular terms and conditions or at all. For further information, see “*Restrictions on Foreign Ownership of Indian Securities*” on page 222. Our ability to raise any foreign capital under the FDI route is therefore constrained by Indian law, which may adversely affect our business, cash flows and financial condition.

**38. Financial instability in other countries may cause increased volatility in Indian financial markets.**

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us.

Furthermore, economic developments globally can have a significant impact on India. In particular, the global economy has been negatively impacted by the conflict between Russia and Ukraine. Governments in the United States, United Kingdom, and European Union have imposed sanctions on certain products, industry sectors, and parties in Russia. The conflict could negatively impact regional and global financial markets and economic conditions, and result in global economic uncertainty and increased costs of various commodities, raw materials, energy and transportation.

In addition, recent increases in inflation and interest rates globally, including in India, could adversely affect the Indian economy. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. These factors may also result in a slowdown in India's export growth. Any significant financial disruption could have an adverse effect on our business, financial condition, cash flows and results of operation.

***39. If inflation rises in India, increased costs may result in a decline in profits and result of operations may be adversely affected.***

Inflation rates in India have been volatile in recent years, and such volatility may continue. Increasing inflation in India could cause a rise in the costs of third-party suppliers and contract manufacturers, rents, wages, raw materials and other expenses. In recent years, India has experienced consistently high inflation, especially and increasingly so in recent months, which has increased the price of, among other things, our rent, raw materials and wages. Further, while the Government of India has previously initiated economic measures to combat high inflation rates, it is unclear whether these measures will remain in effect, and there can be no assurance that Indian inflation levels will not worsen and rise in the future. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows.

***40. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the securities markets in India and other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

***41. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited in a timely manner, or at all.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

***42. Investors may be subject to Indian taxes arising out of income arising on the sale of and dividend on the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realized on the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax ("STT"), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic

stock exchange on which the Equity Shares are sold.

Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. Further, withholding tax may be applicable on sale of shares by Non- Resident / FII under section 115E and 115AD of the Income Tax Act, 1961.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020 and, accordingly, such dividends would not be exempt in the hands of the Shareholders both for residents as well as non-residents. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident Shareholder for the purposes of deducting tax at source pursuant to any corporate action, including dividends.

There is no certainty on the impact of Indian tax laws or other regulations, and which may adversely affect the Company's business, financial condition, results of operations or on the industry in which we operate. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

**43. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting the Application, and Individual Investors are not permitted to withdraw their Application after Issue Closing Date.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Application Amount on submission of the Application and are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting a Application. Individual Investors can revise their Application during the Issue Period and withdraw their Application until the Issue Closing Date. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Issue within three Working Days from the Issue Closing Date, events affecting the Investors' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Application and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Investors' ability to sell the Equity Shares allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline upon listing. QIBs and Non-Institutional Applicants will therefore not be able to withdraw following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or otherwise, between the dates of submission of their Application Form and Allotment.

**44. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.***

The Issue Price of the Equity Shares is proposed to be determined by us in consultation with the BRLM, through a book-building process. This price is based on numerous factors, as described under "Basis for Issue Price" on page 68, and may not be indicative of prices that will prevail in the open market following the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company's performance. As a result of these factors, we cannot assure you that investors will be able to resell their Equity Shares at or above the Issue Price.

**45. *Investors may have difficulty enforcing foreign judgments against us or our management.***

The Company is a limited liability company incorporated under the laws of India. The majority of our directors and executive officers are residents of India. All of our assets and the assets of our Directors are located in India. As a result, it may be difficult for foreign investors to effect service of process upon us or directors to enforce judgments obtained outside India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of the Code of Civil Procedure, 1908 ("CPC"), on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section,

in any country or territory outside of India which the GoI has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India.

However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties. Some jurisdictions including the United Kingdom, United Arab Emirates, Singapore and Hong Kong have been declared by the GoI to be reciprocating countries for the purposes of Section 44A of the CPC. However, the party in whose favor such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

Further, there may be considerable delays in the disposal of suits by Indian courts. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian law. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered.

**46. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.**

Under the Companies Act, a company having share capital and incorporated in India must offer holders of its Equity Shares pre-emptive rights to subscribe and pay for a proportionate number of Equity Shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the Equity Shares who have voted on such resolution. However, if the laws of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, you may suffer future dilution of your ownership position and your proportional interests in us would be reduced.

**47. Our Company has issued Equity Shares during the preceding one year at a price that may be below the Issue Price.**

In the preceding one year from the date of this Draft Red Herring Prospectus, our Company has issued Equity Shares at a price that may be lower than the Issue Price. The price at which Equity Shares have been issued by our Company in the preceding one year is not indicative of the price at which they will be issued or traded after listing. For details on such allotments, see "Capital Structure" on page 87.

**48. Any future issuance of Equity Shares or convertible securities or other equity linked securities by us may dilute your shareholding and sales of the Equity Shares by our major shareholders may adversely affect the trading price of the Equity Shares.**

We may be required to finance our growth through future equity offerings. Any future issuance of our Equity Shares, convertible securities or securities linked to our Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in us. Any future equity issuances by us, including a primary offering, may lead to the dilution of investors' shareholdings in us. Any disposal of Equity Shares by our major shareholders or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. We cannot assure you that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or encumber the Equity Shares in the future. Any future issuances could also dilute the value of your investment in the Equity Shares.

In addition, any perception by investors that such issuances or sales might occur may also affect the market price of the Equity Shares.

**49. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.**

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of the Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether

individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI SAST Regulations.

**50. Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.**

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as shareholders of an entity in another jurisdiction.

**51. Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure ("ASM") and Graded Surveillance Measures ("GSM") by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.**

SEBI and the Stock Exchanges, in the past, have introduced various pre-emptive surveillance measures with respect to the shares of listed companies in India (the "Listed Securities") in order to enhance market integrity, safeguard the interests of investors and potential market abuses. In addition to various surveillance measures already implemented, and in order to further safeguard the interest of investors, the SEBI and the Stock Exchanges have introduced additional surveillance measures ("ASM") and graded surveillance measures ("GSM").

ASM is conducted by the Stock Exchanges on Listed Securities with surveillance concerns based on certain objective parameters such as share price, price-to-earnings ratio, percentage of delivery, client concentration, variation in volume of shares and volatility of shares, among other things. GSM is conducted by the Stock Exchanges on Listed Securities where their price quoted on the Stock Exchanges is not commensurate with, among other things, the financial performance and financial condition measures such as earnings, book value, fixed assets, net-worth, other measures such as price-to-earnings multiple and market capitalization and overall financial position of the concerned listed company, the Listed Securities of which are subject to GSM.

For further details in relation to the ASM and GSM Surveillance Measures, including criteria for shortlisting and review of Listed Securities, exemptions from shortlisting and frequently asked questions (FAQs), among other details, refer to the websites of the NSE and the BSE.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, and low trading volumes as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and / or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company. Any such instance may result in a loss of our reputation and diversion of our management's attention and may also decrease the market price of our Equity Shares which could cause you to lose some or all of your investment.

**Illustration of the Book Building and Price Discovery Process:** Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

#### **Details of the Objects of the Fresh Issue**

##### **1. Capital expenditure towards purchase of machinery and equipment to be used by our Company.**

Our Board, at its meeting held on September 30, 2025, noted that an amount of up to ₹ 1,54,025.00 thousands is proposed to be utilized from the Net Proceeds towards funding the capital expenditure requirements of our Company for the purchase of machinery and equipment. The proposed expenditure is intended for the acquisition of a Vapour Phase Drying Plant, Integrated Transformer Test System, Erection and Commissioning of VPD Plant and Portable Capacitance & Tan Delta Test Set.

The Company proposes to utilize a portion of the Net Proceeds towards the purchase of new machinery and equipment with the objective of enhancing its manufacturing and testing capacities, foraying into new business segments such as solar, and meeting the requirements of its license partners, including Lucy Electricals and Schneider Electric for Compact Substations (CSS) and Prisma Set International. Further, the Company intends to cater to the demand for high-rating transformers with Extra High Voltage (EHV) grade products, thereby strengthening its presence in the EHV market.

These acquisitions are expected to strengthen our in-house manufacturing capabilities, improve production efficiency, and support upcoming project requirements that involve high-precision and high-tonnage operations. The anticipated benefits from these investments include higher production throughput, reduced reliance on external vendors, better process control leading to consistent product quality, and an enhanced ability to cater to increasing customer demand and project volumes.

Our Company has obtained quotations from suppliers but has not yet placed any orders or entered into definitive agreements for the purchase or installation of these machines.

The break-down of such estimated costs are set forth below: -

# Issuer, Our Promoters, Our Promoter Group, Our Directors, Our Key Managerial Personnel and Merchant Banker do not have any personal interest in the proposed acquisition of the machinery or in the entity from whom we have obtained quotations in relation to such proposed acquisition of the equipment.

<sup>^^</sup>The equipment that will be acquired shall be new and shall not be previously owned or utilized by any party.

We have considered the quotations received for the above equipment only for budgetary estimation purposes and no purchase orders have been placed as of the date of this Draft Red Herring Prospectus. The actual cost of procurement and the eventual supplier or dealer may vary at the time of purchase. The quotations received from the vendors are valid as on the date of this Draft Red Herring Prospectus; however, we have not entered into any definitive agreements with such vendors, and there can be no assurance that the same vendors will ultimately supply the equipment or that the cost will remain unchanged.

The proposed equipment models and quantities are based on the present requirements and technical assessments of our management in relation to our transformer and switchgear manufacturing operations. The management will retain flexibility to revise these estimates, including change of vendor, modification, addition, or deletion of equipment, depending on operational needs at the time of placing actual orders. Any surplus proceeds, if available at that stage, may be utilized to procure other machinery, testing systems, or utilities that support our transformer and switchgear manufacturing and testing processes.

The total estimated cost for the purchase of Machinery and Equipment is estimated to be ₹ 1,61,000.00 thousand. We intend to fund ₹1,54,025.00 thousand from the Issue proceeds and the balance ₹ 6,975.00 thousand will be funded from the internal accruals.

All the quotations received are valid as on date of this Draft Red Herring Prospectus. The quotations relied upon for these estimations are valid only for a specified duration and may lapse thereafter. Consequently, there may be escalation in the cost of machinery and testing equipment required for our transformer and switchgear business at the time of actual purchase, which could result in an increase in the estimated capital expenditure.

## **2. Funding working capital requirements:**

We propose to utilize Upto ₹ 1,00,000.00 thousand from the Net Proceeds towards funding our Company's working capital requirements. We have significant working capital requirements, and we fund our working capital requirements in the ordinary course of business from our internal accruals and financing facilities from various banks and financial institutions.

Our Company requires additional working capital for executing increased order volumes, high inventory levels, high debtors, advance payments to suppliers, requirement of security deposits and for other corporate purposes. In light of the above, our Company will require incremental working capital.

**Justification for “Holding Period” levels**

The justifications for the holding levels mentioned in the table above are provided below:

S. No.	Particulars	Details
<b>Current assets</b>		
1.	<b>Trade receivables</b>	<p>In Fiscal 2024, our trade receivable cycle improved to 39 days from 45 days in Fiscal 2023. The reduction was achieved through systematic adoption of bill discounting facilities, tighter integration of invoicing systems with customer platforms, and consistent monitoring of overdue accounts, which collectively accelerated collections during the year.</p> <p>In Fiscal 2025, trade receivable days increased to 82 days. The increase was mainly on account of extended credit terms provided to select customers under large-value contracts. The shift towards larger-capacity transformers also lengthened production and delivery timelines, which in turn extended the billing and collection cycle.</p> <p>For Fiscal 2026 and Fiscal 2027, trade receivable days are expected to stabilize at around 96 and 98 days, respectively. This is based on the order book already secured, where the execution of larger projects involves staggered invoicing milestones and longer payment cycles. Expansion into new geographies and customer segments has also required alignment of credit terms with prevailing market practices, resulting in longer receivable periods.</p>
2.	<b>Inventories</b>	<p>During Fiscal 2023 and Fiscal 2024, the company's inventory days ranged between 52 days to 72 days. This is because, Company's inventory primarily consists of stock-in-trade, raw materials, finished goods and consumables. By maintaining adequate levels of finished goods and stock-in-trade and to shield itself from price disruptions, the Company ensures shorter lead times and the ability to promptly meet customer demand, which is crucial for enhancing market responsiveness and customer satisfaction.</p> <p><b>However, in Fiscal 2025, the inventory days increased to 83 days due to the following reason.</b></p> <p>The company had set up its Fabrication Manufacturing unit at Bhiwadi (Rajasthan) September 2024 to manufacture MS Tanks (Transformer Tanks) to be used as a raw material in manufacturing of Transformers, Panels etc. (Finished Goods). The plant helped us to maintain adequate stock levels to ensure uninterrupted production of finished goods (such as transformers, panels, etc.) in order to meet market demand on time and maintain cost efficiency. Inventory was maintained at an optimal level with the objective of addressing unexpected demand, avoiding supply chain disruptions, and availing bulk purchase discounts.</p> <p><b>For Fiscal 2026 (Estimated) and Fiscal 2027 (Projected),</b> The increase in inventory days are expected to be marginally increase to 84 and 89 days respectively because company is planning to enter into new segments like manufacturing of Power Transformers for Solar Projects in addition to the distribution transformers whose production lead time will be around three to four months. As a result the manufacturing cycles will be extended, requiring larger volume of inventories and longer holding periods.</p>
<b>Current liabilities</b>		
1.	<b>Trade payables</b>	<b>In Fiscal year 2023 &amp; Fiscal year 2024,</b> Trade Payable days marginally declined from 57 days to 56 days due to company's reliance on local sourcing for critical raw materials and insulating

	<p>components, from large suppliers, and packaging materials from MSMEs. They offered tightened credit terms along with trade discounts for early payments, which the company leveraged to maintain cost efficiency</p> <p><b>In Fiscal year 2025,</b> Further trade payable days increased slightly to 58 days reflects negotiated payment terms with key suppliers which helped maintain the stability of trade payable days when compared with previous years.</p> <p><b>In Fiscal 2026 (Estimated) and Fiscal 2027 (Projected),</b> Trade payable days are expected to be marginally decrease to 56 and 54 days respectively because with infusion of capital, the Company plans to secure bulk purchase discounts, more favourable pricing, and expand the vendor base, particularly for specialized components needed for power transformers. The company aims to enhances supply chain reliability, strengthens supplier relationships, and improves cost competitiveness in the transformer manufacturing market.</p>

### GLOBAL ECONOMY

#### Macroeconomic Environment

Global growth is projected to fall from an estimated 3.3 percent in 2024 to 2.8 percent in 2025, before recovering to 3 percent in 2026. This is lower than the projections in the January 2025 WEO Update, by 0.5 percentage point for 2025 and 0.3 percentage point for 2026, with downward revisions for nearly all countries. The downgrades are broad-based across countries and reflect in large part the direct effects of the new trade measures and their indirect effects through trade linkage spillovers, heightened uncertainty, and deteriorating sentiment. For advanced economies, growth is projected to drop from an estimated 1.8 percent in 2024 to 1.4 percent in 2025 and 1.5 percent in 2026. Growth for 2025 is now projected to be 0.5 percentage point lower relative to that in January 2025 WEO Update projections. The forecasts for 2025 include significant downward revisions for Canada, Japan, the United Kingdom, and the United States and an upward revision for Spain. For emerging market and developing economies, growth is projected to drop to 3.7 percent in 2025 and 3.9 percent in 2026, following an estimated 4.3 percent in 2024. This is 0.5 and 0.4 percentage point lower, respectively, compared with the rate projected in the January 2025 WEO Update.

Growth in the euro area is expected to decline slightly to 0.8 percent in 2025, before picking up modestly to 1.2 percent in 2026. Rising uncertainty and tariffs are key drivers of the subdued growth in 2025. Offsetting forces that support the modest pickup in 2026 include stronger consumption on the back of rising real wages and a projected fiscal easing in Germany following major changes to its fiscal rule (the “debt brake”). Within the region, Spain’s momentum contrasts with the sluggish dynamics elsewhere. The growth projection for 2025 for Spain is 2.5 percent, an upward revision of 0.2 percentage point from that in the January 2025 WEO Update. This reflects a large carryover from better-than-expected outturns in 2024 and reconstruction activity following floods.

The Middle East and Central Asia is projected to come out of several years of subdued growth, with the rate accelerating from an estimated 2.4 percent in 2024 to 3.0 percent in 2025 and to 3.5 percent in 2026 as the effects of disruptions to oil production and shipping dissipate and the impact of ongoing conflicts lessens. Compared with that in January, the projection is revised downward, reflecting a more gradual resumption of oil production, persistent spillovers from conflicts, and slower than-expected progress on structural reforms.

## WORLD ECONOMIC OUTLOOK

Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labour market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Global financial conditions remain largely accommodative, again with some differentiation across jurisdictions.

Equities in advanced economies have rallied on expectations of more business-friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic policy uncertainty has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries. Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. Bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

In the Middle East and Central Asia, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3%-point downward revision to 2025 growth in Saudi Arabia, mostly driven by the extension of OPEC+ production cuts. In Latin America and Caribbean, overall growth is projected to accelerate slightly in 2025 to 2.5%, despite an expected slowdown in the largest economies of the region. Growth in sub-Saharan Africa is expected to pick up in 2025, while it is forecast to slow down in emerging and developing Europe.

## INDIA MACROECONOMIC OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for FY25 is estimated at Rs. 33.10 lakh crore (US\$ 3.8 trillion)

Source: <https://www.imf.org/en/Publications/WEO/Issues/2025/01/17/world-economic-outlook-update-january-2025>

with growth rate of 9.9%, compared to Rs. 30.12 lakh crore (US\$ 3.5 trillion) in FY24. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY25. In FY25, India's exports stood at Rs. 37.31 lakh crore (US\$ 433.56 billion), with Engineering Goods (26.88%), Petroleum Products (13.86%) and electronic goods (8.89%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

**India's Gross Domestic Production  
(in Us billion)**

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD) stood at Rs. 98,095 crore (US\$ 11.5 billion) for Q3 of FY25 as compared to Rs. 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

With the announcement of the implementation of the recommendations of the Eighth Pay Commission, which will be in effect from FY27, there is a possibility that the momentum towards achieving fiscal consolidation targets may be delayed. The fiscal deficit and debt targets, as per the GoI's 2018 amended FRBMA, are 3% and 40% of GDP, respectively. However, achievement of both of these targets is likely to be delayed because of the additional pressure on revenue expenditures due to revised salaries and pensions of government employees. A similar impact would also be felt by the states.

**FISCAL DEFICIT IN RELATION TO GDP(%)**

In FY26, the main fiscal policy intervention required would be an attempt to restore infrastructure expansion momentum to support real GDP growth. There would be some positive movement on fiscal consolidation both in FY25 and FY26. Some other changes in the FY26 budget may relate to the revision of import tariffs and some rationalization of personal income tax rate and its deduction structure.

In the medium-term, in view of the impact of Eighth Pay Commission recommendations, the path of fiscal consolidation would lose momentum. We consider that, in the medium-term, real GDP growth can still be maintained at 6.5% and nominal GDP growth at 10.5% with some inter-year variations. A combination of slower nominal GDP growth in FY24 and FY25 and pressure on the INR may push the US\$5 trillion Indian economy milestone from FY28 to FY30. To address this, nominal GDP growth must recover to at least 10.5% beyond FY25, and INR depreciation against the US\$ must be moderated.

### **Trend In Capital Expenditure**

Capital expenditure is the money spent by the government on the development of machinery, equipment, building, health facilities, education, etc. It also includes the expenditure incurred on acquiring fixed assets like land and investment by the government that gives profits or dividend in future.

Capital expenditure, which leads to the creation of assets are long-term in nature and allow the economy to generate revenue for many years by adding or improving production facilities and boosting operational efficiency. It also increases labour participation, takes stock of the economy and raises its capacity to produce more in future.

### **Foreign Exchange Reserves**

India's total foreign exchange reserves stood at USD 688.13 billion as on April 25, 2025, reflecting a stable and healthy external sector position. The reserves almost rose by \$11.83 billion in a month. As of April 4, 2025, India's foreign exchange reserves stood at \$676.3 billion, per the PIB press release.

As of April 25, 2025, India's forex reserves of USD 688.13 billion reflect sound macroeconomic fundamentals and robust reserve management on the part of the RBI. The position of having such elevated reserves indicates the health of India's external sector, reflected in the presence of a controllable current account register, capital inflows that are unaffected and a recovering export performance. It is also a sign of India's greater monetary resilience, that is, a substantial buffer for the central bank to use for interventions in the currency market, if necessary. This serves to stabilize the rupee under conditions of global volatility.

A strong forex reserve position provides better trade resilience as forex reserves stand above 10 months of imports and help to protect against external shocks. "It attracts foreign investment as it lends confidence and is a hedge against sovereign risk premiums. It supports inflation management as the Reserve Bank of India can intervene in the forex market to limit imported inflation, especially from spikes in oil prices as well as commodity prices.

India's reserves are diversified across the following assets:

- Foreign Currency Assets (FCAs): The largest component, these assets provide liquidity and comprise the major G-10 currencies. It is the first in line in terms of protecting against exchange rate movements. Currently, FCAs stand at \$580.66 billion.

- Gold: The yellow metal, which stands at \$84.37 billion, provides a hedge against weakness in the dollar and in terms of substitutability in cases of geopolitical risks, particularly during uncertain times globally.
- Special Drawing Rights (SDRs): Allocated by the IMF for additional liquidity, SDRs can be converted to usable currencies, should the need arise. The SDRs reserves are at \$18.59 billion.
- Reserve Tranche Position (RTP): These reserves stood at \$4.51 billion. All these reserves add to a diversification that protects against concentration risk and promotes economic stability. It provides policy flexibility, while maintaining confidence on the part of global investors and credit agencies.

### **Road ahead for the Indian Economy**

India's economy grew by 6.2% in Q3 FY25. Signs of recovery are now visible, with growth expected to rise to 7.6% in Q4 FY25—indicating a possible turnaround in the coming months. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10.0 % to Rs. 11.21 lakh crore (US\$ 131.42 billion) over Rs. 10.18 lakh crore (US\$ 119.34 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total exports of goods and services rose by 5.5% to a record Rs. 69.8 lakh crore (US\$ 820.9 billion) in FY25, compared to Rs. 65.8 lakh crore (US\$ 773.0 billion) in FY24.

Key priorities include:

- Boosting Consumption: Wage growth, employment initiatives, and targeted welfare programs are essential to reviving domestic demand.
- Encouraging Private Investment: Streamlined policies, reduced tariffs, and greater ease of doing business can attract both domestic and foreign investors.
- Expanding Global Trade: Lowering trade barriers and enhancing export competitiveness are crucial to capturing a larger share of global markets.
- Sustaining Reforms: Addressing inefficiencies in the informal sector, agriculture, and traditional industries will ensure more balanced growth.
- Monetary Policy Adjustments: While rate cuts may provide short-term relief, they must be complemented by structural measures to stimulate demand and investment.
-

### **Power and Electrical Equipment Industry**

Power generation refers to electricity production using different types of technologies in order to supply power to the electrical grid for society's electrical needs. It includes electricity produced in electricity-only plants and in combined heat and power plants.

The main types of power generation are hydroelectricity, fossil fuel electricity, nuclear electricity, solar electricity, wind electricity, geothermal electricity, biomass electricity, and other electricity. Hydroelectricity, also known as hydroelectric power or hydroelectric energy, is a type of energy that generates electricity by harnessing the power of moving water, such as water running over a waterfall. Energy for power generation is derived from both conventional (non-renewable) and renewable sources. The different types of grids include off-grid and on-grid, which are used by the residential, commercial, industrial, and transportation sectors.

The power generation market size has grown strongly in recent years. It will grow from \$2017.51 billion in 2024 to \$2117.01 billion in 2025 at a compound annual growth rate (CAGR) of 4.9%. The growth in the historic period can be attributed to rise in power consumption, government initiatives for energy infrastructure, emerging economies, technology advancements, and market liberalization.

The power generation market size is expected to see strong growth in the next few years. It will grow to \$2633.56 billion in 2029 at a compound annual growth rate (CAGR) of 5.6%. The growth in the forecast period can be attributed to growth in industrial sector, increasing demand for electricity, an increase in investments and growing use of electricity in transportation. Major trends in the forecast period include changing business models of electric utilities, adoption of batteries to store energy, digital technologies in power generation, nuclear power generation, development of solar tracking mounts technology, deployment of advanced ultra-supercritical (AUSC) solutions, power plant transmissions, and innovations in waste-to-energy technologies.

### **Electrical Equipment**

Electrical equipment produces products that generate, distribute and use electrical power. Electrical equipment's primary function is to accomplish work by converting electrical energy and controlling electrical energy, including protecting systems, property, and people.

The main types of electrical equipment are electric lighting equipment, household appliances, power generation, transmission, and control equipment, batteries and wires, and cables. Home appliances are electrical machines that aid in household functions such as cooking, cleaning, and food storage. The equipment is operated through online and offline modes. The various sales channels include OEM and aftermarket that are used by B2B and B2C end users.

The electrical equipment market size has grown strongly in recent years. It will grow from \$1667.51 billion in 2024 to \$1752.23 billion in 2025 at a compound annual growth rate (CAGR) of 5.1%. The growth in the historic period can be attributed to economic growth in emerging markets, favorable government initiatives, and technological advances.

The electrical equipment market size is expected to see strong growth in the next few years. It will grow to \$2200.5 billion in 2029 at a compound annual growth rate (CAGR) of 5.9%. The growth in the forecast period can be attributed to innovations in electrical equipment, rising investments in energy efficient infrastructure, and favorable government initiatives. Major trends in the forecast period include premiumization of electrical equipment, developing smart appliances, developing energy-efficient products, developing and deploying E-Commerce platform, strategic alliances and collaborations in order to expand its development activities.

### **Key Growth Drivers**

The rapid pace of innovations in electronics technology is stimulating consistent demand for newer and faster electronic equipment. Technological development is a key to attracting both consumers and business users for either replacing or upgrading the older products with advanced versions. Digital technologies such as the internet of things (IoT) and the latest communication technologies such as 5G are expected to aid in the development of innovative electronic products. This is expected to increase the demand for electronic products which will ultimately drive the growth of the electronic equipment manufacturing market during the forecast period.

Expanding manufacturing industry is expected to propel the growth of the electrical equipment market going forward. The manufacturing industry is the sector of the economy that transforms raw materials into finished goods through various processes, often involving machinery, labor, and technology. The manufacturing industry is rising due to increasing global demand for products, advancements in technology and automation, and a growing emphasis on efficiency and sustainability in production processes. Electrical equipment is essential in the manufacturing industry for powering machinery, controlling production processes, ensuring safety, and enhancing efficiency and automation in operations.

Electric power infrastructure encompasses the comprehensive network of facilities and equipment responsible for producing, transmitting, and delivering electricity from power plants to consumers. Its primary goal is to provide a consistent, efficient, and secure supply of electrical energy to meet today's energy needs.

The main types of electric power infrastructure are generation infrastructure, transmission infrastructure, distribution infrastructure, renewable energy infrastructure, and non-renewable energy infrastructure. Generation infrastructure comprises power plants that convert energy sources into electricity, forming the foundation of the power supply chain. It shows various voltage levels, such as low voltage (LV), medium voltage (MV), high voltage (HV), and extra high voltage (EHV), for several applications, including residential, commercial, industrial, utility, transportation, and others.

The electric power infrastructure market size has grown strongly in recent years. It will grow from \$265.75 billion in 2024 to \$284.32 billion in 2025 at a compound annual growth rate (CAGR) of 7.0%. ## Indian Power Industry

Power is among the most critical components of infrastructure, crucial for the economic growth and welfare of nations. The existence and development of adequate power infrastructure is essential for sustained growth of the Indian economy. The fundamental principle of India's power industry has been to provide universal access to affordable power in a sustainable way. The Ministry of Power has made significant efforts over the past few years to turn the country from one with a power shortage to one with a surplus by establishing a single national grid, fortifying the distribution network, and achieving universal household electrification.

India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power to viable non-conventional sources such as wind, solar, agricultural, and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required.

India's wind energy sector is making significant strides towards achieving the ambitious target of 100 GW of production by 2030, according to the Indian Wind Turbine Manufacturers Association (IWTMA). The all-India peak power demand in FY26 is expected to be 277 GW. In FY25, India consumed 1,694 billion units of electricity, an increase of 33% over FY21, translating into a 5-year CAGR of 7.4%. India's energy demand is expected to grow in the range of 6-6.5% over the next five years.

India is the third-largest producer and consumer of electricity worldwide, with an installed power capacity of 472.46 GW as of April 30, 2025.

As of April 30, 2025, India has a total installed capacity of 223.62 GW for renewable energy sources, including large hydropower. The breakdown is as follows: Wind power at 51.05 GW, solar power at 107.94 GW, biomass/co-generation at 10.74 GW, small hydro power at 5.10 GW, waste to energy at 0.85 GW, and large hydro at 47.92 GW. This diverse mix highlights India's significant strides in expanding renewable energy infrastructure for a more sustainable energy future.

India's power generation witnessed its highest growth rate in over 30 years in FY23. Power generation in India increased by 6.80% to 1,452.43 billion kilowatt-hours (kWh) as of January 2024. According to data from the Ministry of Power, India's power consumption stood at 1,503.65 BU in April 2023.

### **Road Ahead**

In the current decade (2020-29), the Indian electricity sector is likely to witness a major transformation with respect to demand growth, energy mix and market operations. India wants to ensure that everyone has reliable access to sufficient electricity at all times, while also accelerating the clean energy transition by lowering its reliance on dirty fossil fuels and moving toward more environmentally friendly, renewable sources of energy. Future investments will benefit from strong demand fundamentals, policy support and increasing government focus on infrastructure.

The Government of India is preparing a 'rent a roof' policy for supporting its target of generating 40 GW of power through solar rooftop projects by 2022. It also plans to set up 21 new nuclear power reactors with a total installed capacity of 15,700 MW by 2031.

The Central Electricity Authority (CEA) estimates India's power requirement to grow to reach 817 GW by 2030. Also, by 2029-30, CEA estimates that the share of renewable energy generation would increase from 18% to 44%, while that of thermal energy is expected to reduce from 78% to 52%.

The government plans to establish renewable energy capacity of 500 GW by 2030.

### **Switchgear Industry within Power Infrastructure**

India Switchgear Market is growing owing to increasing adoption of smart switchgear and rising investment in developing renewable energy along with government regulations or subsidies. The increasing energy demands across various end-user industries have led to an increased focus on renewable energy solutions that has enabled the adoption of smart switchgears in the region. Moreover, innovations in smart grid technologies and growing focus toward environmental protection have further boosted the demand for switchgear. Surging demand for safe and secure control distribution systems and advanced monitoring units is increasing the capability for switchgear.

Many enterprises are adopting switchgear as a cost-effective solution. Moreover, government assistance in the form of installation cost subsidies and tax breaks, high reliability and efficiency, modular structure with reduced maintenance requirements, performance enhancement through technological advancements; and increased penetration of smart switchgear and hybrid switchgears for smart cities in developing economies are driving the market. Additionally, the growing need for high voltage and ultra-high voltage switchgears in commercial and industrial sectors are exponentially increasing, which positively affects the market's growth and is expected to boost the India Switchgear market during the forecast period.

### **Market Size of Switchgear Industry**

Electrical switchgear or switchgear refers to a centralized collection of circuit breakers, fuses, and switches (circuit protection devices) that act to safeguard, regulate, and isolate electrical equipment. These circuit protection devices are mounted in metal

constructions and they distribute power to various sections of a facility and the electrical loads within those sections. A collection of one or more of these structures is called a switchgear line-up or assembly. Switches are connected directly to the supply system by placing in the low & high voltage planes of the power transformer. The device de-energizes to clear the fault, test & maintain. These devices are critical in the power system to protect the equipment from the heavy current. Manual control provision, entire reliability, and manual control provision are some of the features of the switchgear.

The fundamental purpose of switchgear is protection, which is the termination of short-circuit, overload fault currents while preserving service to unaffected circuits and to enhance system availability by providing several sources to feed a load. Switches can function in both normal and abnormal conditions that can operate for proper electrical energy utilization and can be installed in residential, commercial, and industrial structures places, etc.

## Growth Potential in the Switchgear Industry

The rapid growth in investment in renewable energy infrastructure and power generation capacities is expected to drive the India switchgear market during the forecast period. The rapid expansion of the market is attributed to the growing number of association and enterprises that are taking initiatives to invest in renewable energy sources. For instance, according to the India Brand Equity Foundation (IBEF), renewable energy for new power generation capacity attracted with investment in renewable energy in India reached around USD 14.5 billion in 2022, an increase of 125% over 2021 and 72% higher than in the pre-pandemic period of the 2019-20 financial year. Additionally, to support and promote the development of high-efficiency Low Voltage (LV) switchgear module, the government of India started the PLI in 2021 with an investment of INR 4,500 crore or USD 615.71 Million for enhancing India's manufacturing capabilities and enhancing exports. According to the "National Programme on High-Efficiency Solar PV Modules" the national government had allocated an additional INR 19,500 crore or USD 2,668 Million in 2022 to lessen reliance on imports and enhancing the capability of renewable energy. Thus, the growth in the investment in renewable energy for infrastructure setup has increased the demand of switchgear in the market.

### *Increasing Adoption of Smart Switchgear*

The growing adoption of smart Internet of Things (IoT) ready switchgears solutions are one of the key fundamental factors driving the India Switchgear market. Owing to the continuous developments in infrastructure and production facilities, enterprises are concerning more on adapting the smart power distribution products like smart switchgears. Smart switchgear enables real-time monitoring, predictive diagnostics, and precise protection against electrical faults. Moreover, many enterprises are seamlessly enabling devices to interact with building management systems, extending supervisory control and other enterprise-level utility systems to regulate power flow and achieve energy savings.

Moreover, with such enormous efforts for integration of renewable energy into the grid, smart switchgears are acting as a catalyst in fulfilling the requirements of high level of energy efficiency and power distribution. These intelligent switchgears offer cloud connections, predictive diagnostics, flexibility, and service continuity. Furthermore, the adoption of smart switchgears is enhancing uptime making modern businesses more competitive and limiting intervention cost with advanced programming of load cycle and improved sustainable capabilities. Therefore, an increasing number of smart IoT ready switchgears solutions has led to the growth of switchgear in the market.

## OUR BUSINESS PROCESS

### *Transformer Manufacturing Process*

We manufacture a wide range of oil-cooled distribution transformers with a streamlined production process:

1. **Core:** The process commences with the careful preparation of high-grade steel coils, which serve as the critical foundation of the transformer. This initial stage involves selecting premium materials and employing precise techniques to ensure structural integrity and optimal magnetic performance, laying a solid groundwork for the entire unit.
2. **Coil Winding:** In the next phase, state-of-the-art machinery is utilized to wind copper or aluminium conductors into the transformer's coils. This step demands exceptional accuracy and efficiency, with advanced equipment ensuring uniformity and strength, which are vital for the transformer's electrical efficiency and operational reliability.
3. **Core & Coil Assembly:** This stage involves the skilled integration of the core and coiled components into a single, cohesive unit. Expert technicians align and assemble these elements with precision, optimizing the transformer's performance, stability, and energy efficiency to meet stringent industry standards.
4. **Drying / Heating:** The transformers then enter a critical drying and heating phase, where controlled conditions are applied to eliminate moisture from the core and coils. This process enhances the unit's durability, prevents insulation degradation, and ensures long-term reliability under varying operational environments.
5. **Surface Treatment & Painting:** A comprehensive surface treatment and painting process follows, designed to protect the transformer from environmental factors such as corrosion, UV exposure, and physical wear. This step applies a high-quality, durable finish that not only safeguards the unit but also contributes to its aesthetic and functional longevity.
6. **Tank & Tanking Process:** The final step involves encasing the fully assembled transformer in a robust, custom-designed tank. This enclosure provides essential protection, ensures safe operation, and facilitates easy installation, completing the transformation into a ready-to-use product that meets both safety and performance expectations.

### *Control Relay Panels Manufacturing Process*

We also produce high-quality control relay panels through a detailed manufacturing workflow:

## CONTROL PANEL MANUFACTURING PROCESS

- Design & Documentation:** The process begins with the creation of precise designs and comprehensive documentation, where blueprints and technical plans are developed to outline the specifications and requirements of each control panel.
- Electrical Assembly:** This stage involves the careful assembly of electrical components, where wiring, circuit breakers, and other electrical elements are meticulously installed to form the core functionality of the panel.
- Mechanical Assembly:** Next, the mechanical structure is built, integrating the electrical components into a sturdy frame or enclosure, ensuring durability and proper alignment for operational efficiency.
- Testing & Quality Checks:** The final step includes rigorous testing and quality inspections, where each panel undergoes thorough checks to verify performance, safety, and compliance with industry standards before being deemed ready for use.

### Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) **Phase I:** This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, an Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) **Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI pursuant to its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI pursuant to its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.
- c) **Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Individual Bidders using the UPI.

The processing fees for applications made by Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

## **RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES**

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (*earlier known as Department of Industrial Policy and Promotion*) (“DPIIT”), issued the FDI Policy, which is effective from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. Under the current FDI Policy, 100% foreign direct investment is permitted in the Manufacturing Sector, under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. For further details of the aggregate limit for investments by NRIs and FPIs in our Company, see “**Issue Procedure – Bids by Eligible NRIs**” and “**Issue Procedure – Bids by FPIs**” on page [●] and [●], respectively.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. For further details, see “**Issue Procedure**” on page [●].

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-Debt Instruments Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the FDI Policy and the FEMA Non-Debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.
